Ann Jones AM
Chair
Children, Young People and Education Committee
National Assembly for Wales
Cardiff Bay
CF99 1NA

23 October 2014

Dear Ann,

Thank you for your letter of 15 October, requesting additional information to inform the Committee's inquiry into Child and Adolescent Mental Health Services (CAMHS). My comments in response to your questions are as follows and I look forward to receiving the Committee's final report in due course.

The level of CAMHS provision is not sufficient to meet the needs of young people in Wales who need a specialist, medical service.

I do not agree the level of CAMHS provision is insufficient to meet the needs of young people requiring a specialist service. By its very nature a specialist service concentrates and is highly skilled in working within a more restricted field. It was never the intention that specialist CAMHS should become the catch all for young people with emotional wellbeing and mental health problems. Alternatives would, and in many cases should, be more appropriate and beneficial for the individual allowing specialist CAMHS to concentrate on those with more complex and severe mental health problems. As my earlier evidence to Committee showed, specialist CAMHS have seen an increase of 103% in referrals between 2010 and 2014 and are seeing 70% more people within the 4 week target during the same period.

Those requiring specialist CAMHS, invariably do have their needs met, and where these are assessed to be urgent, or an emergency, then CAMHS responds accordingly, in a timely manner. There needs to be agreement among professionals, both in the NHS and partners elsewhere, as to how the needs of those young people who are inappropriately referred to specialist CAMHS can be catered for. There is evidence of good practice, in the work we are progressing through our service improvement plan, for example by engaging School Based Counselling; and through our multiagency Together for Mental Health Children, Young People and Families Delivery Assurance Group. However, more needs to be done to ensure CAMHS is organisationally and professionally geared to do what the highly skilled clinicians in the Service can do best. This is why I have asked Professor, Dame Sue Bailey, an internationally respected child psychiatrist and past president of the Royal College of

Psychiatrists, to lead the discussion on the future role of CAMHS. This will commence in earnest early in the new year.

That difficulties exist for those children and young people who do meet the criteria for CAMHS, including waiting times, clinic-based services and the use of prescription medication.

I have already acknowledged waiting lists are an issue which is being addressed through our service improvement plan. The problem has been exacerbated by too many inappropriate referrals into specialist CAMHS, which have to be seen and assessed, but which often do not reach the threshold for treatment. This is not acceptable, it takes up the limited time of specialist clinicians and, more importantly, is not in the interests of the young person. As an example in 2012, the NHS Delivery Unit (DU) undertook a contacts audit of CAMHS to gain an understanding of demand. This snapshot showed that of 2,400 contacts reviewed almost a quarter of new referrals were for anxiety (fear and phobia) (11.3%), low mood (6.7%) and relationship problems (6%). Many of these can be more appropriately dealt with in primary care, which is why we have invested in the development of Local Primary Mental Health Support Services, under the Mental Health (Wales) Measure; or by other partners, such as Schools Based Counselling, with support, rather than reliance on specialist CAMHS. This is in line with my priorities for prudent healthcare, enabling the most appropriate professional to work within their competency and ensuring the young person is not stigmatised from the outset as receiving specialist mental health services.

I agree clinic-based services are not always the most appropriate, although this will depend on the condition and individual circumstances. The NHS DU contacts audit showed 13% of all patient contact occurred in the patient's own home. Whether this should be higher will depend on our service reconfiguration work, led by Prof. Bailey. However, I also recognise the importance of CAMHS being accessible in the community and, for the first time, health boards have agreed the establishment of community Crisis Intervention and Treatment Teams. This is a key action in our service improvement plan and I am very pleased that health boards and the CAMHS/Eating Disorder Planning Network have been able to agree business cases and funding so quickly. Pending recruitment the teams should be fully operational across all-Wales, for the first time, from April 2015.

As for the use of prescription medicine, clinicians are bound to work within NICE guidelines and where these advocate prescription medicine as the optimum treatment, this is because there is a robust evidence base underpinning their effectiveness. Nevertheless, expanding the use of psychological therapies is a key commitment and one where I have invested £650,000 in the current year. I have provided further information in relation to the use of this funding in CAMHS in response to your question below.

The absence of services for those children and young people who do not meet the criteria for CAMHS means that there is a significant level of unmet need.

I agree with the Committee, the system as currently configured may not always work in the best interests of young people with emotional wellbeing and mental health needs. Here I include not just the NHS, but partner agencies also. You are aware I consequently asked that CAMHS work to address current problems with provision and also undertake a fundamental review of the shape of their services to ensure they are fit to meet the needs of children and young people for the future. Here the prudent principles I wish to see embedded in all services must be adopted at pace.

Services should carry out the minimum appropriate intervention, and for many young people inappropriate labelling and stigmatization with a mental illness at an early age will not help them. There are many services that, sometimes with the support of CAMHS, can work with

such children and young people effectively. This has to be part of the integrated approach that promotes cooperation rather than duplication. Similarly this brings in the principle of professionals across all disciplines and the “only do, what only you can do” principle. I am also keen to ensure, in order to promote equity, the principle that it is the individual’s clinical need which matters when it comes to deciding NHS treatment. This should mean those with the most acute clinical need are seen quickly, but those who have less acute needs must also be managed in a timely but proportionate manner.

That is why, to support CAMHS and its partners in this task, I am pleased that Prof. Sue Bailey has agreed to facilitate the challenging discussions needed to support service change. We have also placed Sian Richards, a former senior NHS Executive, to work alongside Carol Shillibeer (Chair of the CAMHS/Eating Disorder Planning Network) and the wider CAMHS network to support the transformational work. My intention is that this work should move CAMHS services significantly forward to make them fit for the future needs of young people, rather than services, which in some areas, developed from a model first designed as Child Guidance Clinics, many decades ago.

Whilst preliminary work has commenced, the major redesign work will commence on December the 5th when Professor Sue Bailey meets with officials and then key CAMHS stakeholders in the CAMHS Network meeting. Sue has already asked for, and received, a set of background briefing including work and evidence presented to the CYPE committee to inform her thinking. Sian Richards will also start inputting a significant amount time with WHSCC and the Network to support improvement in December.

The next major step will be when I launch a wider national conference and workshop session, planned for March to meet with a wider group of stakeholders from all sectors. Sue and Sian will work with the Network to shape the attendee list and discussions. The aim of the conference will be to begin to agree with stakeholders a consensus as to the shape of future services and meet the needs of those young people who have a need for specialist treatment, but also a plan as to how to respond to those who do not, and ensure effective provision is in place to meet their needs working with partner agencies. Change management and service redesign is a challenging task, but I am determined that we do agree a way forward at pace, the work aims to have an agreed plan with clear deliverables and dates for delivery by late 2015 .

I hope the committee will agree with me this root and branch review and work to modernise is an appropriate next step to be taken with pace and commitment following the Committee’s important work, which has highlighted some real concerns for us all.

An update on the analysis of prescribing trends, which was due to take place in October 2014.

I attach tables which show the prescribing trends for stimulant drugs used in treating attention deficit disorder for the period 2000 to mid 2014, using prescribing data held by NHS Wales Shared Services. The information is for total numbers of prescriptions dispensed. These do not equate to number of individuals treated who are likely to be receiving regular prescriptions. One table is provided for community prescribing the other for hospital prescribing. Prescribing information is not available at the individual patient level and therefore Shared Services are unable to undertake analysis by age. A proportion of these prescriptions will consequently be given to adults not under 18s. This group of drugs will also occasionally be used to treat narcolepsy a rare condition. However broadly speaking it is reasonable to assume the majority of such prescriptions will be given to young people receiving treatment for ADHD.

I should also add that as prescriptions for antidepressants and antipsychotics are also not available by age and the very large numbers of adults receiving prescription would entirely overwhelm the small numbers of young people receiving such treatment, I have not provided detailed information on any other drugs.

We are however scoping the potential and possible costs of utilising the Swansea University SAIL data for this purpose, as it has access to anonymised information held on GP systems including by age. I will consider whether to proceed if the benefits of 'mining' this information outweigh the costs associated with access.

An update on psychological therapies plans (which were due to be put in place by LHBs by August 2014).

Psychological therapy plans have now all been agreed and in respect of CAMHS the following will be funded. A summary of the plans is set out in Annex 1.

Bst wshes,

M
rk

Mark Drakeford AC / AM

Y Gweinidog Iechyd a Gwasanaethau Cymdeithasol
Minister for Health and Social Services

Annex 1

Psychological Therapy Provision in CAMHS

Cwm Taf provider area (Cwm Taf, Abertawe Bro Morgannwg and Cardiff and Vale Health Boards)

Funding has been allocated to CAMHS, which will fund training to enable 10 staff to be trained to Improving Access to Psychological Therapies (IAPT) level C competence; 15 staff to undertake CBT for internalising disorders training; and 15 staff to undertake systemic training for depression and self-harm. All training will be undertaken between January and May 2015.

Aneurin Bevan Health Board

Dialectical Behaviour Therapy (DBT) - to repeat the highly successful and effective 10 day DBT training in house for up to two groups of staff (a total of 32) including a dedicated course for a significant section of our CAMHS and child and family workforce

Eye Movement Desensitisation and Reprocessing (EMDR) - to develop the specialist child skills of staff working with children and adolescents and invest in specialist additional training for three members of staff

Systemic Family Therapy - to buy in 5 skills refresher days for child and family services and run 2 further training days for staff in other parts of the service.

Attachment approaches - training psychologists and CAMHS nurses in Dyadic Developmental Psychotherapy.

Acceptance and Commitment Therapy (ACT) - two day introduction to ACT for staff across specialties and disciplines.

Betsi Cadwaladr Health Board

The Health Board will allocate circa 80 places to staff to undertake training in CBT. This will include Parabl (Tier 0); Local Mental Health Primary Support Service (Tier 1); CMHT (Tier 2); BCUHB volunteer counselling services, and specialist services, including inpatient, rehabilitation, OPMH and CAMHS

Powys Health Board

Have chosen to focus activity on older people in this funding round.

Hywel Dda Health Board

Dialectical Behaviour Therapy (DBT) – five day foundation training for four places.

Cognitive Behaviour Therapy Diploma – potential to train two staff in primary/secondary care to diploma level.

Acceptance Commitment Therapy – training 12 staff.

Assessment and Training Day – Psychology Solutions Partnership – training day for 35 staff.

Hospital Pharmacy Data - The figures supplied represent the number of issues from Hospital Pharmacies.

An issue can be either items dispensed to a patient or can be a bulk issue to a ward or clinic.

The current hospital pharmacy system does not allow for any further breakdown of hospital prescribing data
