

10/9/11.

Dear Sir / Madam,

I am writing to you to protest most strongly about the many proposed windfarm developments for the area of mid-Wales in Powys.

I beg you to just look carefully at all the proposals and their efficiency or lack of it. I know many large, often not British, firms are going to make millions of pounds if these proposals go ahead, but look at the cumulative effect of all the proposals in this area. Think of the back-up needed from

conventional power sources - oil & gas.
Think of the enormous damage to
the environment caused by building
setting up and maintaining the
infrastructure for the turbines / ps bars.
Ask yourselves, will this work? Will
this provide, really provide, a
greener energy source, when
everything involved has been taken
into account? I don't believe it
will and I truly believe that,
if examined honestly with no
regard to business profits ~~for~~ for
foreign large companies, anyone
would have to conclude that I
am right! Please, please just look
at the facts, the true facts, and
then make your decision about all
our futures.

Yours faithfully,
