

20/9/2011

Dear Clerk.

I am writing to give my views on the proposed wind farms, Hub and Pylons to be erected through Mid Wales. I feel that this would destroy an area of outstanding beauty, local communities would suffer due to people moving out of the area, the fall in the tourist trade, not sending their children to schools in areas where there are Pylons due to increased health risks (Proper Report). When my wife and I bought our home one of the main points was the "Stunning Rural views" this is now under threat due to Pylons and wind farms. We are also concerned about our children we have a young family and our son will start school in the village next September, his friend's parents have already looked into sending their children to other schools due to the pylons and the health risks they involve. This could mean the closure of our school if children were taken out of the area to school because of the pylons. There are other points that concern me such as increased flooding in this area and increased traffic both causing wide spread damage to highways and local property.

I feel that there must be a better way that would not cause so much damage to the area, such as Hydro or Solar power and feel that over all these types of renewable energy would be greener in the long term as they are less destructive to the landscape and surrounding area and under ground cables to transport the electricity would not destroy the stunning views of our beautiful country.

I would like to thank you for taking the time to consider my views on this matter

yours Sincerely
